2002 – 2008 NYMC, NY

Westchester Institute for Human Development, Web Designer, Accessibility Specialist

Created and developed the complete Institute website that conforms with Section 508 and WWW Consortium web accessibility standards. Designed the project plans, interview outlines, information architecture documents, site flowcharts, and user interface documentation. Conducted extensive interviews with staff and created user profiles which lead to the construction of site structure. Designed and developed the prototypes and implemented the final website design. Included in the development phase of the website were the following:

- Design of information architecture
- Creation of user interface prototypes
- Content editing, writing and proofreading
- HTML, CSS and JavaScript coding
- Creation of page templates
- Graphics creation and photo editing
- Accessibility testing
- Technical documentation

Maintenance and development of websites including design of information architecture, user interface design and page template design. Design and creation of graphics and promotions, photo editing, optimization of graphics for website implementation. Web programming using HTML, CSS and Javascript or related internet language. Accessibility coding and testing, ensuring conformance with Section 508 and World Wide Web Consortium (W3C) web accessibility standards. Content development, editing, writing and proofreading of content for the web medium. Research and development of new and revised web pages and features. Creation of outline and content for web accessibility, usability and design seminar. Troubleshooting and resolution of site problems and user concerns. Creation of user interface prototypes. Quality control and testing of websites, ensuring consistency, ease of access, adherence to editorial standards and technical requirements.

2000 – 2002 Consulting for Merck-Medco Managed Care, LLC

Web Designer

Designed user interfaces for health content, health centers and health management tools, including HTML coding, implementation of JavaScripts and Cascading Style Sheets. Created templates for html page types, designed online promotional images and other web graphics, edited and proofread content and managed projects.

- Designed user interfaces for health assessment tools, condition specific health centers, invita-

tion based health management tools, online promotions and articles.

- Coordinated projects and processes with developers, editors and producers; was integrally involved in a project's complete development cycle, from analysis and requirement study, design and development, to testing and implementation.
- Actively participated in focus group testing, creation of interfaces to internal style guide and documentation, analyzed approaches to user interface creation and development theories.
- Managed content and graphics with Broadvision database, uploaded graphics to web templates using custom tools.
- Created web pages and templates for condition specific health centers and article types.
- Created demos for different online experiences, including messaging and health centers.
- Extensively used Homesite for coding HTML fast and efficiently.
- Created internal guides for content formatting and maintained project documentation binders.

Multimedia Solutions Corp. MSC

1999 – 2000, Junior Designer

Designed and coded websites, updated page code, implemented Javascripts and created graphics. Created storyboards and AfterEffects animations for video and web, assisted the animator in different aspects of producing the videos.

- Developed consumer websites utilizing HTML and graphics creation software (PhotoShop, Fireworks), coded HTML and applied Javascripts.
- Designed graphics for multimedia, animation and compact disc production including storyboarding and quality control testing.
